CEO COMMENTS

CONTINUED FOCUS ON CUSTOMIZED SOLUTIONS AND COST EFFICIENCY

PostNord reported a moderate year-on-year improvement in operating income in the quarter, while still posting a minor loss mainly due to restructuring costs. PostNord's markets are still experiencing sharp reductions in mail volumes and continued heavy competition within the logistics business.

On April 1st, PostNord implemented a new organizational structure. The change process is progressing well including efficiency improvements and cost savings as well as development of customized end-to-end solutions, primarily within the logistics business.

Net sales totaled SEK 9,816m, a year-on-year increase of 1%. The increase was mainly due to acquisitions within the logistics business. The mail market continued to decline due to the competition from the digitization. Total mail volumes for the Group declined by 3% year-on-year: 10% in Denmark and 1% in Sweden. Mail volumes were positively impacted during the quarter by mailings related to the EU election in May. Corresponding mail volumes for the first six months declined by 5% in total, of which 11% in Denmark and 3% in Sweden.

Group operating income totaled SEK -30m (-90) during the second quarter. The result is explained by the dramatic drop in mail volumes and continued heavy competition within the logistics business, as well as to restructuring costs. Cost savings from the reorganization during the spring will have full impact at the beginning of the second half 2014. Cash flow from operating activities totaled SEK 120m (-50) and was positively impacted by improved working capital.

Profitability remains at an unsatisfactory level, and additional cost savings are required to improve earnings and create greater financial value. To succeed in this, it is essential to adapt postal-specific regulations to changes in customer demand. We welcomed the new Postal Act in Denmark, enacted early this year, and we are engaged in an active dialogue in Sweden to achieve the necessary adaptations to Swedish postal regulations that will ensure the ability to maintain good universal postal service in the long term under reasonable economic conditions, despite continued reductions in mail volumes. This is also essential for the achievement of our ambitious environmental goals.

Our new organizational structure provides the basis for integrated production activities in each country, which will improve our customized range of services offerings. Together with the improved brand structure, focused on one common brand, we are increasing clarity towards our customers positioning PostNord as a leading Nordic logistics operator with a geographically competitive end-to-end offer.

¹⁾ Includes assets under management.

Group net debt totaled SEK 2,926m on June 30, 2014, compared with SEK 2,128m on March 31, 2014. The main reason for the increase is a revaluation of pension liabilities due to a lower discount rate. The definition of "net debt" was changed as of 2014 in conjunction with the adoption of new financial targets at the 2014 AGM, after which figures for 2013 were restated. See also the "Definitions" note.

The net debt ratio (net debt/equity) improved to 33%, compared with 23% as of March 31, 2014. The net debt ratio is within the range (10-50%) defined in the new financial targets. The net debt/EBITDA ratio (rolling 12-month) was 1.4.

Financial preparedness totaled SEK 3,074m, compared with SEK 2,993m as of March 31, 2014. Financial preparedness consisted of cash and cash equivalents of SEK 1,074m and unutilized committed credit of SEK 2,000m with maturity 2017 (which replaced during the quarter the previous credit facility with maturity 2016). Cash flow for the quarter had a positive impact on cash and cash equivalents, primarily due to improved working capital. As of June 30, 2014 PostNord had SEK 793m in outstanding interest-bearing debt maturing within 12 months.

The capital efficiency program proceeds according to plan, mainly including adjusting fixed capital to market conditions and improving working capital in accordance with Group strategy.

CASH FLOW

April-June

Cash flow from operating activities totaled SEK 120m (-50). The year-over-year increase was mainly attributable to improved operating income and lower accounts receivable. Cash flow was negatively impacted by utilized restructuring-related provisions totaling SEK 138m, of which SEK 125m was related to personnel.

Cash flow from investing activities totaled SEK -467m (-610). The improvement was mainly due to that no acquisitions were made during the quarter compared with the previous year. The investments in tangible fixed assets of SEK 407m (378) were primarily attributable to production vehicles, transport and sorting equipment and facilities related to the establishment of the new terminals in Sweden.

Cash flow from financing activities totaled SEK 426m (251). During the period the Group raised a total of SEK 550m (400) in new loans under the PostNord MTN program, and dividend of SEK 129m (103) was distributed to parent company owners.

January-June

Cash flow from operating activities totaled SEK -349m (375). The decrease was mainly attributable to reduced cash flow from changes in operating capital, mainly due to a decrease in accounts payable.

Cash flow from investing activities totaled SEK -930m (-1,367). The improvement was mainly due to that no acquisitions were made during the first six months and lower investments in tangible fixed assets compared with 2013. Investments in tangible fixed assets were primarily made in production vehicles, transport and sorting equipment and facilities related to the establishment of the new terminals in Sweden.

Cash flow from financing activities totaled SEK 371m (114). During the period the Group raised new loans totaling SEK 750m (400), and loans totaling SEK 200m (150) were amortized under the MTN program. Dividend of SEK 129m (103) was distributed to parent company owners in April.

OUTLOOK

PostNord anticipates continued sharp volume reductions for mail in Denmark and Sweden due to competition from digital alternatives. PostNord maintains its previous assessment that mail volumes may decline 12-14% in Denmark and 4-5% in Sweden during 2014. Continued strong growth for e-commerce in the Nordic region is projected for 2014 with positive effects for parcel and goods distribution volumes, albeit under strong price competition.

PostNord's Group strategy includes the repositioning of Group operations in relation to market changes, securing profitability within Mail & Communication and developing the Group's position in the Nordic logistics market. This also involves an intensified focus on cost reductions, the effective use of capital and continued financial stability. Additional structural- and cost savings actions are necessary, compared to previously anticipations. These actions are expected eventually to generate improved profitability and cash flow. It is PostNord's ambition, including fulfilled cost savings actions, to maintain its rating as an investment grade company.

During the 2014-2016 period, PostNord's total investments are expected to amount to 3-5% of Group revenues.

NOTES TO FINANCIAL STATEMENTS

Note 1 Accounting principles

The consolidated financial statements were prepared in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB), together with interpretation statements from the International Financial Reporting Interpretations Committee (IFRIC), to the extent that they have been approved by the European Commission for application within the European Union. In addition to IFRS, additional rules from the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's RFR 1, Supplemental Financial Statements for Groups, were also applied. PostNord Group's interim report is prepared in accordance with IAS 34, Interim Financial Reporting, and with supplementary rules from the Annual Accounts Act. The same accounting principles and methods of calculation were used in this interim report as in the 2013 Annual Report, and changes in accounting principles were also applied.

The parent company applies the Annual Accounts Act and RFR 2, Accounting for Legal Entities; in effect, the same accounting principles as the Group. The differences between the parent company's and the Group's accounting principles result from the parent company's limitations in applying IFRS as a consequence of the Annual Accounts Act and the Act on Safeguarding of Pension Commitments, and are to some extent based on tax considerations. The same accounting principles and methods of calculation were used in this interim report as in the 2013 Annual Report, and changes in accounting principles were also applied.

Changes in accounting principles

Changes in accounting principles applicable as of January 1, 2014: IFRS 10-12 and IFRIC 21, Levies. These changes have not had any material effect. See PostNord's 2013 Annual Report, page 105, for additional information.

Note 2 Segment reporting

PostNord's organization into business areas is based on the manner in which PostNord is governed and activities are reported to management. Market pricing applies to internal dealings between PostNord business areas. There is no latitude for making external purchases where the service in question is available internally. In PostNord's operational structure, though not in its legal structure, cost distribution of corporate shared service functions is at cost price with full allocation of costs.

Under the new matrix organization introduced on March 31, 2014, business activities are integrated within each market and the markets have overall responsibility for the entire product and service portfolio as well as sales in each country. Together with the developed brand structure, the new organization further clarifies PostNord for its customers as a Nordic logistics operator.

Market segments (see Markets section)

Market segments are divided into the following country organizations: PostNord Sweden, PostNord Denmark (incl. Germany), PostNord Norway & Finland, PostNord Strålfors and Other countries.

Business segments (see Business Areas section)

Business area Mail & Communication provides distribution solutions in the communication market through its nationwide distribution networks in Sweden and Denmark. The business area offers physical and digital mail, direct mail and newspaper services, as well as facility management services.

Business area Logistics offers logistics services in the areas of parcels, express and messaging, consignment freight, mixed cargo, thermal, Air & Ocean and third-party logistics. Business area Logistics has a comprehensive offering and distribution network for businesses and individual customers in the Nordic market. Parcel services in Denmark were reported in business area Mail Denmark under the previous organizational structure, but are now reported in Logistics.

PostNord Strålfors operates in the area of information logistics. The company develops and offers communication solutions that create stronger, more personal customer relationships for companies that have large customer bases.

Other and Eliminations

Other comprises shared services and corporate functions including the parent company and Group adjustments. The adjustments are IFRS adjustments regarding pensions in accordance with IAS 19, Employee Benefits, and finance leasing in accordance with IAS 17, Lease Agreements. From Other, service costs for shared services and corporate functions are allocated to the business areas. Cost allocations are taken up as income in Other under Other Income, Internal. Within the business areas, cost allocations are recognized in Other Expenses.

Eliminations comprise the elimination of internal transactions.
